Apple Confidential–Internal Use Only

Designed for any space and everyone in the home

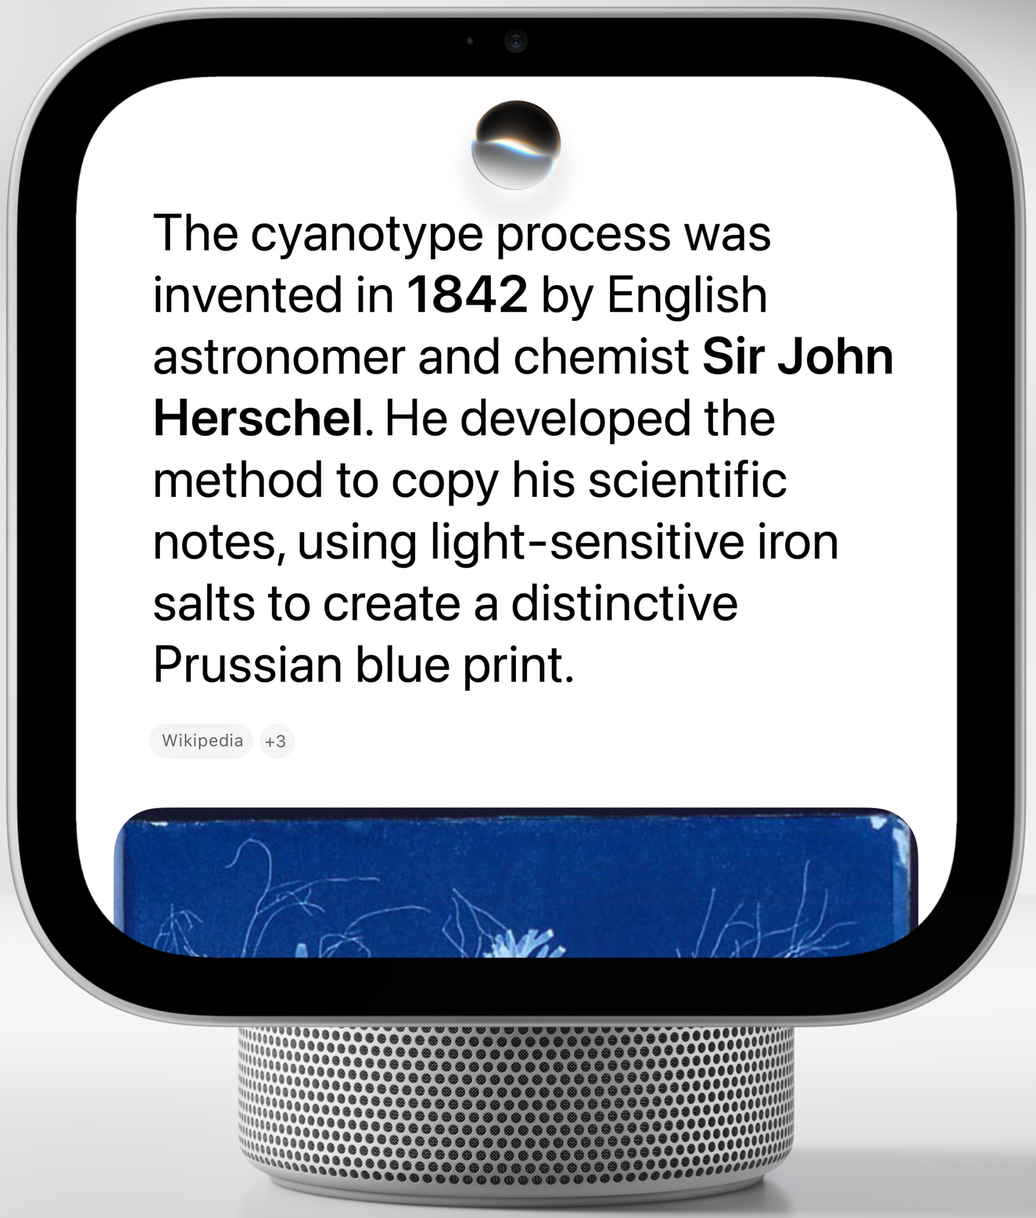

- HomeView features a 7-inch Liquid Retina display[2] connected to a domed aluminium base by a stainless steel hinge, so you can smoothly adjust the angle for comfortable viewing[3]
- Get useful information at a glance and transform HomeView into a digital photo album or interactive artwork with a wide collection of customisable faces, including Photos, Snoopy, Modular, Flow, and more
- HomeView recognises up to six people by face to display personal content from their iPhone or iPad—like Messages, Calendar, and Reminders
- HomeView (Wall Mounted) brings the same display and features in a wall-mounted design, extending the experience to even more spaces within your home[4]
- Three mounts for HomeView (Wall Mounted) are available from Schneider Home[5]

[2] The display has rounded corners. When measured diagonally, the screen is 6.98 inches. Actual viewable area is less. [3] Wired power required. USB-C cable and USB-C power adapter included. [4] Wired power required. Compatible wall mount, USB-C cable, and USB-C power adapter sold separately. [5] Power mounts sold separately.

Powered by Apple Intelligence with Siri AI, Apple HomeView brings entertainment, connection, and smart home management together in one place.

Siri AI[1]

- Siri AI works with your paired iPhone or iPad to find relevant content just for you—like pulling up a party invitation from your calendar or playing the perfect soundtrack to match the vibe
- Siri AI taps into broad world knowledge to provide highly specific, up-to-date answers on virtually any topic—from dinner recipes to DIY home repairs to game-night trivia
- Ask open-ended questions on HomeView and engage in natural, rich conversations that sync on the Siri app, so you can pick up where you left off

[1] Available in English to start. Usage limits may apply. Some features may not be available in all countries and regions or languages. Some devices may not be available in all regions. Siri AI is available in beta in HomeView software version 27.2. Personal context requests require a paired Apple Intelligence-enabled iPhone running the latest software version with Siri AI turned on and set to a supported language. Certain Apple Intelligence features that rely on server-side models are subject to daily usage limits. Expanded access to such features will be available for a fee in the future. Use of these features is subject to the Apple Intelligence Terms and Conditions. Learn more at support.apple.com/148587.

Rich entertainment

- HomeView delivers rich, room-filling sound through powerful speakers, while HomeView (Wall Mounted) delivers sound tuning designed for on-wall placement, and both support Spatial Audio[6]
- Bring your favourite tracks to life on Apple Music with lyrics and animated album art[7]
- Enjoy Podcasts, Audiobooks, News,[8] TV, and supported third-party audio and video apps from your iPhone[9]
- Create a connected sound system for your whole home with multiple HomeView, HomePod, and AirPlay-compatible speakers[10] placed around the house

[6] Spatial Audio works with compatible content in supported apps. Not all content is available in Dolby Atmos. [7] Apple Music requires a subscription. [8] Apple News+ requires a subscription. [9] Subscription may be required to access some content and services. Some applications are not available in all areas. [10] Requires multiple AirPlay-compatible speakers with the latest AirPlay software.

Stay connected to what matters most

- Keep in touch with loved ones near and far using FaceTime with Center Stage, Messages, and Intercom throughout the home
- Get timely, at-a-glance information with Live Activities—like the song currently playing, an active kitchen timer, or an incoming Intercom message from another room
- For Live Activities and Siri responses, the adaptive interface adjusts the level of detail based on your distance from the device

[6] Spatial Audio works with compatible content in supported apps. Not all content is available in Dolby Atmos. [7] Apple Music requires a subscription. [8] Apple News+ requires a subscription. [9] Subscription may be required to access some content and services. Some applications are not available in all areas. [10] Requires multiple AirPlay-compatible speakers with the latest AirPlay software.

The ultimate smart home dashboard

- Control accessories remotely, view cameras, and run home automations with HomeView as a home hub[11]
- See your accessories at a glance with the Home Modular face, so you can quickly trigger scenes or adjust the lights
- Livestream up to nine video feeds with the Home Camera face to keep in touch with what's happening around your home[11]
- With an iCloud+ subscription,[12] HomeView works with compatible security cameras to provide package, pet, vehicle, and people detection, plus Face Recognition[11]
- View HomeKit Secure Video[12] descriptions on HomeView when set up with an Apple Intelligence-enabled iPhone or iPad[13]
- HomeView can detect the sound of the smoke and carbon monoxide alarms in your home and alert you on your iPhone, iPad, or Apple Watch

[1] Requires a HomeKit- or Matter-enabled accessory. Smart home accessory sold separately. [12] HomeKit Secure Video requires a supported iCloud+ plan, compatible HomeKit-enabled security camera, and Apple HomeView, HomePod, or Apple TV 4K running as a home hub. [13] Video summaries and natural language search for HomeKit Secure Video camera recordings require setup using an Apple Intelligence–enabled iPhone or iPad and a subscription to an eligible iCloud+ plan. Requires a home hub such as Apple HomeView, HomePod (2nd generation), HomePod mini, or Apple TV 4K with the latest operating system software.

Private and secure

- Access your personal content on HomeView when your paired iPhone or iPad is connected to the same Wi-Fi network and has been recently unlocked, and HomeView recognises you by face[14]
- Privacy is designed right into the silicon with the A18 chip featuring Secure Exclaves

[14] Requires a compatible iPhone or iPad running the latest software.

Quick Demos

Show the display and faces

- Point out the stunning 7-inch Liquid Retina display, and mention that HomeView comes with a collection of faces that fit any room’s decor, mood, and setting.
- Show the Photos Face, and tell customers that they can frame their photo subjects with Portrait-style depth effects. Mention that with Shared Albums, everyone can add their favourite shots to a digital photo frame.
- Touch and hold the screen, then swipe to the Analog face and show it to customers. Touch and hold the screen again to share how customers can customise the face’s style and colour.
- Show the Weather and Modular faces, and point out how information like the weather and calendar events is available at a glance.
- Show the Flow face, and mention that it dynamically reacts to a person’s presence and transforms HomeView into interactive artwork.
- Show the Snoopy face and tap to trigger the animation. Mention that it reacts to the time of day, weather, holidays, and sports events.

Talk about personalised content and Siri AI

- Swipe up to reveal the Home Screen, and mention that it’s personalised to each user with their own apps and widgets.
- Mention that HomeView recognises up to six people by face, and works with each person’s paired iPhone or iPad to surface their personal content right when they need it. Open Messages, as an example, showing content for the recognised user.
- Stand in front of HomeView and point out how far-field microphones can pick up voices from across the room for FaceTime calls and Siri requests.
- Mention that HomeView features Siri AI and say, “Hey Siri, does Adam have a piano lesson today?” Point out how Siri uses an expressive voice and understands personal context to pull up exactly what customers are looking for.
- Ask something like, “Hey Siri, how do I get over jet lag from my previous trip?” and point out how Siri blends broad world knowledge into the moment, alongside personal content.
- Open Safari and select a pinned recipe, then tap the Start Cooking button to view a streamlined format that’s easy to follow. Mention that with step-by-step instructions, timer control, and ingredient tracking, customers can stay focused on what’s cooking.
